

# Odour Control Ductwork

## Containment and conveyance of airstream gasses

Using robust and proven technologies, Formatank assists its clients from concept to project completion by delivering turnkey odour control ductwork packages.

- In house CAD design
- Bespoke GRP covers for the containment of odours
- Full range of ductwork components including vent stacks, fans, and steel bracketry
- Design, manufacture and installation in accordance with DW154
- Suitable for municipal, industrial, recycling, and anaerobic digestion applications
- Retro-fitting onto existing duct systems, or entire new build

"During the delivery of a recent Northumbrian Water project at Bran Sands in Middlesbrough, Formatank were contracted to supply and install odour control equipment which involved the manufacture and design of covers and ductwork. I was pleased with the manner in which Formatank conducted themselves both on and off site, from design through to installation. The finished product was to a very high standard and I would be happy to recommend them for future GRP and/or installation works."

*Andy Vipas, site agent, BAM Nuttall*
