

# GRP Tank Liners

## Breathing new life into old tanks

In response to a rapidly changing world with ever increasing budgetary and environment constraints, there is a very real requirement to "make do and mend". By refurbishing existing tanks and bunds, whether they're made of steel, concrete or plastic, Formatank's lining systems can provide a cost effective solution to your containment, protection and corrosion problems.

- Lamination directly onto glass-coated-steel without grit blasting
- Refurbishment and repair existing tanks and bunds: steel, concrete or plastic
- Formatank will repair your in-situ tank with little or no disruption to existing plumbing
- Renewing tank and bund linings with GRP will save significant capital expenditure

"We have used Formatank to re-line our fire sprinkler tank at the Hillstreet Shopping Centre in Middlesbrough. I can confirm that Formatank have carried out the works to a high standard and in a professional manner, they complied with all Health & Safety rules and site specific instructions. We found all staff to be helpful and completed the necessary works on time and were available for any queries that we may have had."

*Colin Smith, Operations Manager. Hill Street Shopping Centre*
