

GRP Tanks

Bespoke GRP tanks and water management from the people who really know

Formatank design and manufacture GRP tanks for a variety of storage uses including water or chemical holding tanks, marine life stockade, and loose material bunkering. Our experienced engineers will produce vessels that are formed as one-piece components or split down to manageable sizes for manoeuvring into restricted spaces, designed for above ground or buried below ground, and to suit any volume or capacity.

- In house CAD design for bespoke tanks
- External & internal tank insulation
- Full range of standard tank furniture including hatches, vents and spigots
- Risk assessments, water safety plans, inspection, & testing of water systems to comply with HSE Approved Code of Practice & Guidance L8 on legionnaires disease
- Supply of chemicals and chemical dosing systems to control bacteriological growth
- Ozone technology to remove and control Legionella in cooling towers

"As you know we were really pleased with the service & customised product that we received from Formatank. The finish on the tank was really good and we were able to fit our tank linings without the need for additional filling materials. We were proud to dispatch it to our customer in Canada and the feedback that we have received is that it exceeded their expectations and that they will be recommending us to other researchers."

Terri Gill, Managing Director. Precision Acoustics Ltd
